	Cannon <i>cannon.stl from the base set</i>	4	Black	No
	Cannonball <i>cannonball.stl from the base set</i>	10	Something bright, like neon green or orange	No

The parts marked "from the base set" come with the free base set download. Get it at cannonsandcoastlines.com/print-list/base-set.

MATERIAL	LAYER HEIGHT	Z CONTOURING	INFILL
PLA	0.16 mm or lower	On	10% or more

Printing and putting it together

1. Print the fit test (*ship-tolerance-test.stl* in the base set) first. If a peg is loose, scale it up 0.5 to 1% in your slicer. If it's tight, sand it a bit.
2. Lay each cannon so the flex arm's layers run across the bend, and print a spare or two.
3. Stretch a thin rubber band around each wheel's rim and push the wheel into the slot under the stern. It should be snug but still spin, and it stays in.
4. Plug the fittings into the deck. Each hit knocks one off, and a bare hull sinks on the next hit.
5. To fire, plug a cannon into an open slot, drop in a cannonball and press the arm down.

What a game needs

For a game you also need coins, islands and terrain. They're in the free base set, and its print list has everything a game needs. cannonsandcoastlines.com/print-list/base-set
