	Short mast <i>mast-short.stl</i> One per island	1–2	Brown	No

PER TABLE

	PART	QTY	COLOR	SUPPORTS
	Rock <i>rock1.stl</i> With three or more players, 2 per fleet.	2–6	Grey	No
	Reef <i>reef.stl</i>	0–2	Pale pink	No
	Wind dial <i>wind-dial-*.stl</i> Optional. A steel M8 washer spins better.	1 each	Any	No
	Fit test <i>ship-tolerance-test.stl</i> Print it first.	1	Anything	No

Printing and putting it together

1. Print the fit test (ship-tolerance-test.stl in the base set) first. If a peg is loose, scale it up 0.5 to 1% in your slicer. If it's tight, sand it a bit. If it won't go in at all, your nozzle is probably too close to the bed.
2. Print a spare cannon or two. The arm loses tension after a few hundred shots.
3. Stretch a 10 mm rubber band or silicone cable tie around each wheel's rim and push the wheel into the slot under the stern. It should be snug but still spin, and it stays in.
4. Plug the fittings into the deck.
5. Slide the sails down over the masts, and a paper flag into the slot at the top of a mast.
6. Plug a short mast into each island for its flag.

Also needed

Each player needs their faction card, some paper flags for the masts and a cloth bag for the coins.
