

All fleets print list

Base Set v0.5.4, *Treasure Fleet v1*, *Stone Fleet v1*, *Shadow Fleet v1*, *The Industry v1*, *The Islanders v1*. Online at cannonsandcoastlines.com/print-list/all-fleets

There's a folder for each fleet, each with its own plates folder. The base-set folder also has the parts the add-on fleets borrow, and the islands, coins and terrain. The plates folder at the top has the masts, cargo, cannons and wheels for every fleet together.

HOW TO DO IT

1. **Get the files.** The STLs are in this zip. The plates folder has a 3MF for each color, with the settings, for OrcaSlicer or CubbySlicer.
2. **Print each color** with the settings below.
3. **Put it together** with the steps at the end.

	Rock <i>rock1.stl</i> With three or more players, 2 per fleet.	2-6	Grey	No
	Reef <i>reef.stl</i>	0-2	Pale pink	No
	Wind dial <i>wind-dial-*.stl</i> Optional. A steel M8 washer spins better.	1 each	Any	No
	Fit test <i>ship-tolerance-test.stl</i> Print it first.	1	Anything	No

Printing and putting it together

1. Print the fit test (ship-tolerance-test.stl in the base set) first. If a peg is loose, scale it up 0.5 to 1% in your slicer. If it's tight, sand it a bit. If it won't go in at all, your nozzle is probably too close to the bed.
2. Print a spare cannon or two. The arm loses tension after a few hundred shots.
3. Stretch a 10 mm rubber band or silicone cable tie around each wheel's rim and push the wheel into the slot under the stern. It should be snug but still spin, and it stays in.
4. Plug the fittings into the deck.
5. Slide the sails down over the masts, and a paper flag into the slot at the top of a mast.
6. Plug a short mast into each island for its flag.

Also needed

Each player needs their faction card, some paper flags for the masts and a cloth bag for the coins.
