

# Stone Fleet print list

Stone Fleet v1. Online at [cannonsandcoastlines.com/print-list/stone-fleet-set](https://cannonsandcoastlines.com/print-list/stone-fleet-set).

## HOW TO DO IT

1. **Get the files.** The STLs are in this zip. The plates folder has a 3MF for each color, with the settings, for OrcaSlicer or CubbySlicer.
2. **Get the free base set too**, from [cannonsandcoastlines.com/print-guide](https://cannonsandcoastlines.com/print-guide). It has the masts, cargo, cannons and wheels, and the coins, islands and terrain a game needs.
3. **Print each color** with the settings below.
4. **Put it together** with the steps at the end.

3 barges with 4 fittings each (2 masts, 2 barrels)

|                                                                                  | PART                                                              | QTY | COLOR                                       | SUPPORTS |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------|-----|---------------------------------------------|----------|
|  | <b>Hull</b> <i>ship-stone-fleet.stl</i>                           | 3   | Matte grey or speckled rock PLA, or both    | No       |
|  | <b>Sail</b> <i>sail-stone-fleet.stl</i>                           | 6   | White                                       | No       |
|  | <b>Mast</b> <i>mast.stl from the base set</i>                     | 6   | Brown                                       | No       |
|  | <b>Barrel</b> <i>barrel.stl from the base set</i>                 | 6   | Brown                                       | No       |
|  | <b>Movement wheel</b> <i>movement-wheel.stl from the base set</i> | 3   | Any                                         | No       |
|  | <b>Cannon</b> <i>cannon.stl from the base set</i>                 | 4   | Black                                       | No       |
|  | <b>Cannonball</b> <i>cannonball.stl from the base set</i>         | 10  | Something bright, like neon green or orange | No       |

|                 |                                    |                     |
|-----------------|------------------------------------|---------------------|
| <b>MATERIAL</b> | <b>LAYER HEIGHT</b>                | <b>Z CONTOURING</b> |
| PLA             | 0.12–0.20 mm (0.16 mm recommended) | On                  |
| <b>WALLS</b>    | <b>ORIENTATION</b>                 | <b>INFILL</b>       |
| 4               | Use your slicer's auto-orient.     | 10% or more         |

## Printing and putting it together

1. Print the fit test (*ship-tolerance-test.stl* in the base set) first. If a peg is loose, scale it up 0.5 to 1% in your slicer. If it's tight, sand it a bit. If it won't go in at all, your nozzle is probably too close to the bed.
2. Print a spare cannon or two. The arm loses tension after a few hundred shots.
3. Stretch a 10 mm rubber band or silicone cable tie around each wheel's rim and push the wheel into the slot under the stern. It should be snug but still spin, and it stays in.
4. Plug the fittings into the deck.
5. Slide the sails down over the masts, and a paper flag into the slot at the top of a mast.
